I'm someone who is committed and has a strong focus on technical growth. With at least 5 years of experience. I have been working as a backend developer and trying to be a good Full Stack Developer. Furthermore, I like to discuss topics such as performance, efficiency and best practices. Likewise, I'd love to work on projects where I can take full advantage of the latest technologies in the Angular/React ecosystem. Enjoy sharing knowledge and motivating co-workers to complete their objectives, both technological and human. I'm looking for relocation to have new experiences working on what I am passionate about.

Work Experience

Telus International — *2022 - current*
Full Stack Engineer
- I am part of Digital Solutions team. TELUS International is the global arm of TELUS Corporation, one of the largest telecommunications service providers in Canada.
- Responsible for the detail design, documentation, development, unit testing and maintenance of applications.

Tech Stack: Confluence, Kubernetes, Docker, React, JavaScript, TypeScript, GitHub, Jira, Confluence, Slack, REST API, GraphQL.

Rappid Software Design Inc — *Dec. 2020 - Dec. 2021*
Full Stack Developer
- Rappid Design is a software development agency.
- We developed an app where you find all the skills and services available to you from the suppliers in your community. In this project, we use Flutter in the frontend and Firebase as backend. As a full stack developer. I am in charge of adding new functionalities to the app. And adding and improving new cloud functions.
- I developed a vaccination module. This module increased app use and improve the follow-up of the customers.

Tech Stack: NoSQL, SQL, Firebase, Cloud Functions, GCP, MongoDB, MySQL, ORM, Angular, Flutter, Dart, JavaScript, TypeScript, Bitbucket, Jira, Confluence, Slack, REST API.

Traeguate — *Mar. 2020 - Dec. 2020*
Full Stack Developer
- Traeguate is a carpooling app. I was part of the software development team. Specialized in backend area. Integrated to the frontend team.
- Responsible for developing web and mobile applications. I developed and integrated electronic invoicing. I had the experience of working with different members of the company.
- Likewise, I implemented the generation of electronic invoices and sending them to our clients by email or text message.

Tech Stack: NoSQL, Firebase, Cloud Functions, Pub/Sub, GCP, MongoDB, Angular, Flutter, Dart, JavaScript, TypeScript, Bitbucket, Jira, Confluence, Slack, REST API.

Consulting

Project X – 2021 - 2022
Web application used by the sales team
- Designed a quote and invoicing system for the sales team.
- Used and hosted it with Firebase using Angular, NodeJS, cloud functions, Pub/Sub
- Migrated a process that used to be done through Excel and decreased the amount of human errors. Streamlined the process from quote to invoice.
- Added a module for customer support which allows clients of the company to fill out a complaint form.
